Department:

Pre-Professional

Program Description:

This is a transfer program for students interested in becoming a chiropractor. Chiropractic is a system of mechanical therapeutics focused on how the nervous system affects overall health and wellness. A chiropractor adjusts the spinal column and other parts of the body to prevent disease and correct problems. The chiropractor will examine and treat patients in the office, advise them as to diet and exercise, use heat and therapy treatment, x-ray, and other medical equipment. Successful completion of two years of college prior to admission to chiropractic college is required.
